TAPS™ ODOR NEUTRALIZER FORMULA

A DIFFERENT APPROACH TECHNICALLY

This formula has a little less reach, but it doesn't cost as much as the Countervailant™. The difference lies in its blend of natural oils which provide some very novel properties. It solubilizes some odor molecules and pairs with others to form neutral-smelling compounds (Zwaademaker pairings).

Still other combinations are formed which change physical and chemical properties. As with the Countervailant™ formula, dilution rates are controlled by odor intensity. Start at 100:1, and adjust from there.

Why two formulas? In short, to offer you a choice. Odor perception varies somewhat from person to person. Similarly, so does perception of solutions. We suggest that you try both to decide which product you like the best.
