TAPS™ ODOR CONTROL VENT FILTERS

SAME SONG, DIFFERENT VERSE

The same novel and highly effective chemical technology used in Taps™ Odor Control Scrubbers and Manhole Inserts is used in our Vent Filters. The odor problem is the same - the solution is also the same, but the shape of the tool is different. Taps™ Vent Filters are used on vent pipes of homes, commercial buildings, small lift stations and EQ tanks.

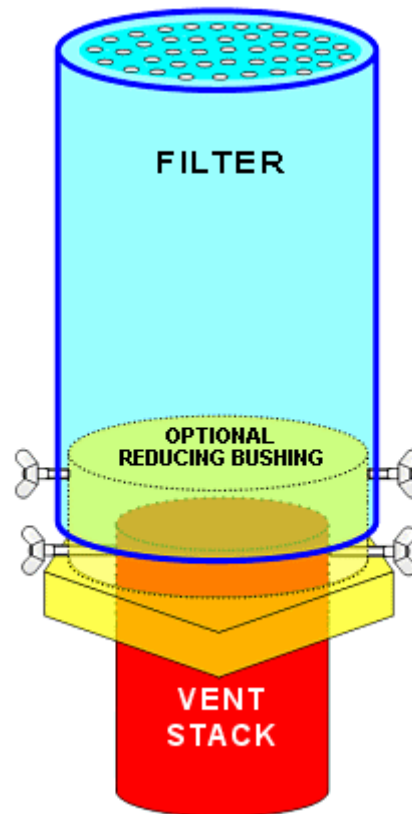

All units are refillable. The 3", 4" and 6" filters are made of black ABS. The 8" and custom filters are constructed of white PVC. Larger sizes can be used on smaller stacks by using a spigot x socket reducing bushing (see [Pricing](#)). This is recommended where practicable because larger sizes will maximize service life between granule change-outs.

INSTALLATION COULD NOT BE EASIER:

1. If using a Reducing Bushing, you may either glue to vent pipe or use thumbscrew(s).
2. Push Taps™ Filter over vent pipe or bushing
3. Tighten thumbscrew(s) - (3" and 4" have a single thumbscrew for filter and for bushing. 6" and 8" have two thumbscrews for each).

SUMMARY OF ADVANTAGES:

- Superior odor control
- Durable
- Minutes to install
- Easy to change-out
- Affordable

(For perspective, dot in foreground is a US 25¢ piece)

FOR STANDARD PVC PIPE				
DESCRIPTION	3"	4"	6"	8"
